Journal of Alloys and Compounds 279 (1998) 309–313

Journal of ALLOYS AND COMPOUNDS

Subject Index of Volume 279

Absorption and emission spectra
crystal field analysis of Pr^{3+} and Nd^{3+} ions in $KR(WO_4)_2$ (R=Y or Gd) potassium rare-earth tungstates 83
Ag addition
the effects of Ag addition and magnetic field on melt-processed $YBa_2Cu_3O_x$ superconductors 220
Alloy microstructure
effect of microstructure, composition and non-stoichiometry on electrochemical properties of low-Co rare-earth nickel hydrogen storage alloys 295
Al–Si alloys
solubility and precipitation of AlP in Al–Si melts studied with a temperature controlled filtration technique 237
Aluminium phosphide
solubility and precipitation of AlP in Al–Si melts studied with a temperature controlled filtration technique 237
Aluminum
mechanical solid state mixing for synthesizing of SiC_p/Al nanocomposites 263
Amorphous
effect of heat treatment on the corrosion behaviour of amorphous Mg-18 at% Ni alloy 252
Amorphous alloy
the interface between metallic substrates and layers of electrodeposited Co–W amorphous alloys 272
thermal stability and hydriding properties of nanocrystalline melt-spun $Mg_{63}Ni_{30}Y_7$ alloy 279
Amorphous alloys
FMR study of crystallization in the amorphous alloy $Fe_{67}Co_{18}B_{14}Si_1$ (Metglas 2605CO) 233
Antiferromagnetic
magnetic properties of the borocarbides $R_3B_xC_{4-x}$ (R=Gd, Ho; $x<1$) with Sc_3C_4-type structure 97
Artificial intelligence
computational materials design using artificial intelligence methods 8
Atomistic computer simulation
toward cellular automata: the role of atomistic simulation in determining material structures 75
Attractor basins
predicting ultra-hard binary compounds via cascaded auto- and hetero-associative neural networks 47
Auto-associative networks
predicting ultra-hard binary compounds via cascaded auto- and hetero-associative neural networks 47
Autonomous discovery
predicting ultra-hard binary compounds via cascaded auto- and hetero-associative neural networks 47

Ball milling
mechanical solid state mixing for synthesizing of SiC_p/Al nanocomposites 263
Barium molybdates
enthalpy increment measurements of $SrMoO_4$(s) and $BaMoO_4$(s) 287

CaF_2 type representatives
unit cell parameters and densities of the gadolinium dihydride GdH_{2+x} 179
Calorimetry
enthalpy increment measurements of $SrMoO_4$(s) and $BaMoO_4$(s) 287
C-diffusion
measurement of N and C diffusion in Sm_2Fe_{17} by magnetic relaxation 113
Ce–Co–Ga alloys
magnetic and crystallographic properties of $Ce_2Co_{17-x}Ga_x$ compounds 301
Cellular automata
toward cellular automata: the role of atomistic simulation in determining material structures 75
Ceramics
toward cellular automata: the role of atomistic simulation in determining material structures 75
mechanical solid state mixing for synthesizing of SiC_p/Al nanocomposites 263
Cerium cobalt gallides
magnetic and crystallographic properties of $Ce_2Co_{17-x}Ga_x$ compounds 301
Cerium nickel stannide
neutron diffraction study of $CeNi_5Sn$ 110
Charge transfer
a simplified charge transfer model: calculations using an explicit kinetic energy functional 66
Chloromercurates
structural and vibrational studies of mixed potassium–ammonium chloromercurate(II) dihydrates $K_{2.51}(NH_4)_{1.49}Hg_3Cl_{10}.2H_2O$ 161
Chromium–molybdenum catalyst
oxidation of methanol on sodium modified chromium–molybdenum catalysts 132
Cobalt–tungsten
the interface between metallic substrates and layers of electrodeposited Co–W amorphous alloys 272
Complex metal hydride
Mg_3MnH_7, containing the first known hexahydridomanganese(I) complex L8
Composites
mechanical solid state mixing for synthesizing of SiC_p/Al nanocomposites 263
Composition
a plasma kinetics model: analysis of wall loss reactions in dry etching of silicon dioxide 60
Consolidation
mechanical solid state mixing for synthesizing of SiC_p/Al nanocomposites 263
Copper chalcogenides
physical properties and phase transitions of β $Cu_{2-x}Se$ ($0.20 \leq x \leq 0.25$) 136
Copper hafnium sulfides
preparation and crystal structure of a new compound Cu_2HfS_3 215

Elsevier Science S.A.
PII: S0925-8388(98)00758-0

Creativity machine
predicting ultra-hard binary compounds via cascaded auto- and hetero-associative neural networks 47
Crystal field analysis
crystal field analysis of Pr^{3+} and Nd^{3+} ions in $KR(WO_4)_2$ (R=Y or Gd) potassium rare-earth tungstates 83
Crystal structure(s)
neutron diffraction study of $CeNi_5Sn$ 110
breaking up chains: the nitridocuprates(I) Ba[CuN] $Ba_{16}[(CuN)_8][Cu_2N_3][Cu_3N_4]$ and $Ca_4Ba[CuN_2]_2$ 153
preparation and crystal structure of a new compound Cu_2HfS_3 215
Curie–Weiss paramagnetism
evidence of a magnetic moment on the transition metal sublattice in $RFe_{2-x}Cr_xSi_2$ compounds (R=Y, La, Nd, Tb; $0.25 \leq x \leq 1.75$) 102

Defect structures
unit cell parameters and densities of the gadolinium dihydride GdH_{2+x} 179
Deoxidation
thermodynamic properties of oxygen in RE–O (RE=Gd, Tb, Dy, Er) solid solutions 184
Diffusion
molecular dynamics simulations of the self-diffusion phenomena in Ni_2Y intermetallic phase 171
Dimension reduction
materials discovery via topologically-correct display of reduced-dimension data 22
Dysprosium
thermodynamic properties of oxygen in RE–O (RE=Gd, Tb, Dy, Er) solid solutions 184

Electrical resistance hydrogen absorption
effect of hydrogen on the electrical resistance of palladium 259
Electrical transport properties
physical properties of GdNiGa L11
Electrochemical
effect of heat treatment on the corrosion behaviour of amorphous Mg-18 at% Ni alloy 252
Electrochemical hydrogen storage property
effect of microstructure, composition and non-stoichiometry on electrochemical properties of low-Co rare-earth nickel hydrogen storage alloys 295
Electronic structures
alloying effects on the electronic structure of $ZrMn_2$ intermetallic hydride 192
Empirical modeling
unification of neural and statistical methods as applied to materials structure-property mapping 39
Enthalpy increments
enthalpy increment measurements of $SrMoO_4$(s) and $BaMoO_4$(s) 287
Erbium
thermodynamic properties of oxygen in RE–O (RE=Gd, Tb, Dy, Er) solid solutions 184
Exchange interaction
intersublattice exchange coupling in Gd–Mn compounds studied by INS 123

Ferromagnetic
magnetic properties of the borocarbides $R_3B_xC_{4-x}$ (R=Gd, Ho; $x<1$) with Sc_3C_4-type structure 97
Ferromagnetic resonance
FMR study of crystallization in the amorphous alloy $Fe_{67}Co_{18}B_{14}Si_1$ (Metglas 2605CO) 233
First-order magnetic phase transition
changeover in the order of the magnetic phase transition in the intermetallic compounds $(Er_{1-x}Tb_x)Co_2$ 117
FQMG method
the effects of Ag addition and magnetic field on melt-processed $YBa_2Cu_3O_x$ superconductors 220

Gadolinium
thermodynamic properties of oxygen in RE–O (RE=Gd, Tb, Dy, Er) solid solutions 184
Gd–Mn compounds
intersublattice exchange coupling in Gd–Mn compounds studied by INS 123
Gibbs energy
thermodynamic properties of oxygen in RE–O (RE=Gd, Tb, Dy, Er) solid solutions 184

Hard magnetic properties
phase transformation and magnetic properties of mechanically alloyed $NdFe_{12-x}Mo_xN_y$ 229
Heat capacity
enthalpy increment measurements of $SrMoO_4$(s) and $BaMoO_4$(s) 287
Heat treatment
effect of heat treatment on the corrosion behaviour of amorphous Mg-18 at% Ni alloy 252
High capacity
a study of the development of a high capacity and high performance Zr–Ti–Mn–V–Ni hydrogen storage alloy for Ni–MH rechargeable batteries 209
High performance
a study of the development of a high capacity and high performance Zr–Ti–Mn–V–Ni hydrogen storage alloy for Ni–MH rechargeable batteries 209
High-T_C superconductors
the effects of Ag addition and magnetic field on melt-processed $YBa_2Cu_3O_x$ superconductors 220
Hydrides
alloying effects on the electronic structure of $ZrMn_2$ intermetallic hydride 192
Hydrogen decrepitation
the influence of free iron on the hydrogen decrepitation capability of some Nd(Pr)–Fe–B alloys 245
Hydrogen Evolution Testing
effect of heat treatment on the corrosion behaviour of amorphous Mg-18 at% Ni alloy 252
Hydrogen sorption
hydrogen sorption properties of intermetallic TbNiAl and crystal structure of $TbNiAlD_{1.1}$ L4
Hydrogen storage
thermal stability and hydriding properties of nanocrystalline melt-spun $Mg_{63}Ni_{30}Y_7$ alloy 279
Hyper-stoichiometry
a study of the development of a high capacity and high performance Zr–Ti–Mn–V–Ni hydrogen storage alloy for Ni–MH rechargeable batteries 209

Implicit Poisson equation
a simplified charge transfer model: calculations using an explicit kinetic energy functional 66
Inclusions
solubility and precipitation of AlP in Al–Si melts studied with a temperature controlled filtration technique 237
Inelastic neutron scattering
intersublattice exchange coupling in Gd–Mn compounds studied by INS 123

Intermetallic compound(s)
measurement of N and C diffusion in Sm_2Fe_{17} by magnetic relaxation 113
changeover in the order of the magnetic phase transition in the intermetallic compounds $(Er_{1-x}Tb_x)Co_2$ 117
molecular dynamics simulations of the self-diffusion phenomena in Ni_2Y intermetallic phase 171
alloying effects on the electronic structure of $ZrMn_2$ intermetallic hydride 192
IR spectra
structural and vibrational studies of mixed potassium–ammonium chloromercurate(II) dihydrates $K_{2.51}(NH_4)_{1.49}Hg_3Cl_{10}.2H_2O$ 161
Isothermal section
the phase equilibria in the quasi-ternary Cu_2S–CdS–SnS_2 system 142

$LaCl_3$–NaCl–LiCl ternary system
investigation on the phase diagram of the ternary system $LaCl_3$–NaCl–LiCl 127
Lattice constant
concentration dependence of the Néel temperature of $Mn_{100-x}Rh_x$ ordered alloys 93
Laves phase
molecular dynamics simulations of the self-diffusion phenomena in Ni_2Y intermetallic phase 171
Liquid metals
solubility and precipitation of AlP in Al–Si melts studied with a temperature controlled filtration technique 237
Liquid surface
the phase equilibria in the quasi-ternary Cu_2S–CdS–SnS_2 system 142
Low-Co rare-earth nickel hydride alloy
effect of microstructure, composition and non-stoichiometry on electrochemical properties of low-Co rare-earth nickel hydrogen storage alloys 295

Magnesium alloys
thermal stability and hydriding properties of nanocrystalline melt-spun $Mg_{63}Ni_{30}Y_7$ alloy 279
Magnesium manganese(I)hydrides
Mg_3MnH_7, containing the first known hexahydridomanganese(I) complex L8
Magnetic after-effect
measurement of N and C diffusion in Sm_2Fe_{17} by magnetic relaxation 113
Magnetic anisotropy
magnetic and crystallographic properties of $Ce_2Co_{17-x}Ga_x$ compounds 301
Magnetic field
the effects of Ag addition and magnetic field on melt-processed $YBa_2Cu_3O_x$ superconductors 220
Magnetic ordering
evidence of a magnetic moment on the transition metal sublattice in $RFe_{2-x}Cr_xSi_2$ compounds (R=Y, La, Nd, Tb; $0.25 \leq x \leq 1.75$) 102
magnetic and crystallographic properties of $Ce_2Co_{17-x}Ga_x$ compounds 301
Magnetic properties
magnetic properties of the borocarbides $R_3B_xC_{4-x}$ (R=Gd, Ho; $x<1$) with Sc_3C_4-type structure 97
neutron diffraction study of $CeNi_5Sn$ 110
magnetic and crystallographic properties of $Ce_2Co_{17-x}Ga_x$ compounds 301
physical properties of GdNiGa L11
physical properties and phase transitions of β $Cu_{2-x}Se$ ($0.20 \leq x \leq 0.25$) 136
Magnetic susceptibility
concentration dependence of the Néel temperature of $Mn_{100-x}Rh_x$ ordered alloys 93
Materials
materials structure-property prediction using a self-architecting neural network 30
Materials database
the Linus Pauling file (LPF) and its application to materials design 1
Material(s) design
the Linus Pauling file (LPF) and its application to materials design 1
computational materials design using artificial intelligence methods 8
rough sets applied to the discovery of materials knowledge 14
materials discovery via topologically-correct display of reduced-dimension data 22
toward multiscale modelling: the role of atomistic simulations in the analysis of Si and SiC under hydrostatic compression 70
Materials processing
unification of neural and statistical methods as applied to materials structure-property mapping 39
Materials property prediction
computational materials design using artificial intelligence methods 8
materials discovery via topologically-correct display of reduced-dimension data 22
Materials structure prediction
the Linus Pauling file (LPF) and its application to materials design 1
Mechanical activation
mechanochemical synthesis of $PbTiO_3$ from PbO and TiO_2 L1
Mechanical alloying
phase transformation and magnetic properties of mechanically alloyed $NdFe_{12-x}Mo_xN_y$ 229
Metal hydride
hydrogen sorption properties of intermetallic TbNiAl and crystal structure of $TbNiAlD_{1.1}$ L4
Metamagnetic transition
magnetic properties of the borocarbides $R_3B_xC_{4-x}$ (R=Gd, Ho; $x<1$) with Sc_3C_4-type structure 97
Metamagnetism
changeover in the order of the magnetic phase transition in the intermetallic compounds $(Er_{1-x}Tb_x)Co_2$ 117
Metglas
FMR study of crystallization in the amorphous alloy $Fe_{67}Co_{18}B_{14}Si_1$ (Metglas 2605CO) 233
Methanol oxidation
oxidation of methanol on sodium modified chromium–molybdenum catalysts 132
Mg alloys
recovery after ageing of Mg–Y and Mg–Gd alloys 166
Mg–Ni alloy
effect of heat treatment on the corrosion behaviour of amorphous Mg-18 at% Ni alloy 252
Mn–Rh alloys
concentration dependence of the Néel temperature of $Mn_{100-x}Rh_x$ ordered alloys 93
Molecular dynamics
toward multiscale modelling: the role of atomistic simulations in the analysis of Si and SiC under hydrostatic compression 70
molecular dynamics simulations of the self-diffusion phenomena in Ni_2Y intermetallic phase 171
Molecular modelling
toward cellular automata: the role of atomistic simulation in determining material structures 75

Néel temperature
concentration dependence of the Néel temperature of $Mn_{100-x}Rh_x$ ordered alloys 93
Nanocrystalline
thermal stability and hydriding properties of nanocrystalline melt-spun $Mg_{63}Ni_{30}Y_7$ alloy 279
NdFeB alloys
the influence of free iron on the hydrogen decrepitation capability of some Nd(Pr)–Fe–B alloys 245
N-diffusion
measurement of N and C diffusion in Sm_2Fe_{17} by magnetic relaxation 113
Neural network cascades
predicting ultra-hard binary compounds via cascaded auto- and hetero-associative neural networks 47
Neural network(s)
materials discovery via topologically-correct display of reduced-dimension data 22
materials structure-property prediction using a self-architecting neural network 30
unification of neural and statistical methods as applied to materials structure-property mapping 39
predicting ultra-hard binary compounds via cascaded auto- and hetero-associative neural networks 47
Neural network skeletonization
predicting ultra-hard binary compounds via cascaded auto- and hetero-associative neural networks 47
Neutron diffraction
hydrogen sorption properties of intermetallic TbNiAl and crystal structure of $TbNiAlD_{1.1}$ L4
neutron diffraction study of $CeNi_5Sn$ 110
Neutron powder diffraction
Mg_3MnH_7, containing the first known hexahydridomanganese(I) complex L8
Ni–MH battery
a study of the development of a high capacity and high performance Zr–Ti–Mn–V–Ni hydrogen storage alloy for Ni–MH rechargeable batteries 209
Nitride dispersed Al–Ti alloy
preparation of nitrides dispersed Al–Ti alloy by reactive ball milling in N_2 gas 201
Nitridocuprates
breaking up chains: the nitridocuprates(I) Ba[CuN] $Ba_{16}[(CuN)_8][Cu_2N_3][Cu_3N_4]$ and $Ca_4Ba[CuN_2]_2$ 153

Ordered alloy
concentration dependence of the Néel temperature of $Mn_{100-x}Rh_x$ ordered alloys 93
Oxygen annealing
the effects of Ag addition and magnetic field on melt-processed $YBa_2Cu_3O_x$ superconductors 220

Palladium
effect of hydrogen on the electrical resistance of palladium 259
Pauli paramagnetism
evidence of a magnetic moment on the transition metal sublattice in $RFe_{2-x}Cr_xSi_2$ compounds (R=Y, La, Nd, Tb; $0.25 \leq x \leq 1.75$) 102
$PbTiO_3$
mechanochemical synthesis of $PbTiO_3$ from PbO and TiO_2 L1
Permanent magnet materials
the influence of free iron on the hydrogen decrepitation capability of some Nd(Pr)–Fe–B alloys 245
Phase diagram
investigation on the phase diagram of the ternary system $LaCl_3$–NaCl–LiCl 127
the phase equilibria in the quasi-ternary Cu_2S–CdS–SnS_2 system 142
Phase transition
toward multiscale modelling: the role of atomistic simulations in the analysis of Si and SiC under hydrostatic compression 70
physical properties and phase transitions of β $Cu_{2-x}Se$ ($0.20 \leq x \leq 0.25$) 136
Plasma chemistry
a plasma kinetics model: analysis of wall loss reactions in dry etching of silicon dioxide 60
Potassium rare earth tungstates
crystal field analysis of Pr^{3+} and Nd^{3+} ions in $KR(WO_4)_2$ (R=Y or Gd) potassium rare-earth tungstates 83
Pressure
toward multiscale modelling: the role of atomistic simulations in the analysis of Si and SiC under hydrostatic compression 70
Property prediction
materials structure-property prediction using a self-architecting neural network 30
Pyramidal nets
computational materials design using artificial intelligence methods 8
Pyramidal networks
rough sets applied to the discovery of materials knowledge 14

Quaternary compounds
the phase equilibria in the quasi-ternary Cu_2S–CdS–SnS_2 system 142

Raman spectra
structural and vibrational studies of mixed potassium–ammonium chloromercurate(II) dihydrates $K_{2.51}(NH_4)_{1.49}Hg_3Cl_{10}.2H_2O$ 161
Rapid quenching
thermal stability and hydriding properties of nanocrystalline melt-spun $Mg_{63}Ni_{30}Y_7$ alloy 279
Rare earth borocarbides
magnetic properties of the borocarbides $R_3B_xC_{4-x}$ (R=Gd, Ho; $x<1$) with Sc_3C_4-type structure 97
Rare earth chromium silicides
evidence of a magnetic moment on the transition metal sublattice in $RFe_{2-x}Cr_xSi_2$ compounds (R=Y, La, Nd, Tb; $0.25 \leq x \leq 1.75$) 102
Rare earth elements dihydrides
unit cell parameters and densities of the gadolinium dihydride GdH_{2+x} 179
Rare earth intermetallic compounds
physical properties of GdNiGa L11
Rare earth iron compound
phase transformation and magnetic properties of mechanically alloyed $NdFe_{12-x}Mo_xN_y$ 229
Rare earth iron silicides
evidence of a magnetic moment on the transition metal sublattice in $RFe_{2-x}Cr_xSi_2$ compounds (R=Y, La, Nd, Tb; $0.25 \leq x \leq 1.75$) 102
Rare-earth metals
recovery after ageing of Mg–Y and Mg–Gd alloys 166
thermodynamic properties of oxygen in RE–O (RE=Gd, Tb, Dy, Er) solid solutions 184
Rare earth transition metal compounds
intersublattice exchange coupling in Gd–Mn compounds studied by INS 123
Reactive ball milling
preparation of nitrides dispersed Al–Ti alloy by reactive ball milling in N_2 gas 201
Recovery
recovery after ageing of Mg–Y and Mg–Gd alloys 166
Regularities
the Linus Pauling file (LPF) and its application to materials design 1

Resistivity
physical properties and phase transitions of β $Cu_{2-x}Se$ ($0.20 \leq x \leq 0.25$) 136
Rough sets
rough sets applied to the discovery of materials knowledge 14

Schema elucidation
predicting ultra-hard binary compounds via cascaded auto- and hetero-associative neural networks 47
Selenides
physical properties and phase transitions of β $Cu_{2-x}Se$ ($0.20 \leq x \leq 0.25$) 136
Silicon
toward multiscale modelling: the role of atomistic simulations in the analysis of Si and SiC under hydrostatic compression 70
Silicon carbide
toward multiscale modelling: the role of atomistic simulations in the analysis of Si and SiC under hydrostatic compression 70
Single-crystal
structural and vibrational studies of mixed potassium–ammonium chloromercurate(II) dihydrates $K_{2.51}(NH_4)_{1.49}Hg_3Cl_{10}.2H_2O$ 161
Sm_2Fe_{17}
measurement of N and C diffusion in Sm_2Fe_{17} by magnetic relaxation 113
Sodium influence
oxidation of methanol on sodium modified chromium–molybdenum catalysts 132
Solid solution decomposition
recovery after ageing of Mg–Y and Mg–Gd alloys 166
Solution of oxygen
thermodynamic properties of oxygen in RE–O (RE=Gd, Tb, Dy, Er) solid solutions 184
Spin fluctuations
changeover in the order of the magnetic phase transition in the intermetallic compounds $(Er_{1-x}Tb_x)Co_2$ 117
Statistics
unification of neural and statistical methods as applied to materials structure-property mapping 39
Stoichiometry and non-stoichiometry
effect of microstructure, composition and non-stoichiometry on electrochemical properties of low-Co rare-earth nickel hydrogen storage alloys 295
Strontium molybdates
enthalpy increment measurements of $SrMoO_4$(s) and $BaMoO_4$(s) 287
Structure
structural and vibrational studies of mixed potassium–ammonium chloromercurate(II) dihydrates $K_{2.51}(NH_4)_{1.49}Hg_3Cl_{10}.2H_2O$ 161
Structure refinement
hydrogen sorption properties of intermetallic TbNiAl and crystal structure of $TbNiAlD_{1.1}$ L4
Substrate influence
the interface between metallic substrates and layers of electrodeposited Co–W amorphous alloys 272
Supervised learning
materials structure-property prediction using a self-architecting neural network 30
Surface reaction
a plasma kinetics model: analysis of wall loss reactions in dry etching of silicon dioxide 60
Synthesis
mechanochemical synthesis of $PbTiO_3$ from PbO and TiO_2 L1

Terbium
thermodynamic properties of oxygen in RE–O (RE=Gd, Tb, Dy, Er) solid solutions 184
Ternary Nitrides
breaking up chains: the nitridocuprates(I) Ba[CuN] $Ba_{16}[(CuN)_8][Cu_2N_3][Cu_3N_4]$ and $Ca_4Ba[CuN_2]_2$ 153
Thermal stability
preparation of nitrides dispersed Al–Ti alloy by reactive ball milling in N_2 gas 201
Thermodynamic functions
enthalpy increment measurements of $SrMoO_4$(s) and $BaMoO_4$(s) 287
Thermodynamics
thermodynamic properties of oxygen in RE–O (RE=Gd, Tb, Dy, Er) solid solutions 184
$ThMn_{12}$-type compound
phase transformation and magnetic properties of mechanically alloyed $NdFe_{12-x}Mo_xN_y$ 229
Thomas–Fermi kinetic energy functional
a simplified charge transfer model: calculations using an explicit kinetic energy functional 66
Ti nitride
preparation of nitrides dispersed Al–Ti alloy by reactive ball milling in N_2 gas 201

Ultrahard materials
predicting ultra-hard binary compounds via cascaded auto- and hetero-associative neural networks 47
Unsupervised learning
materials structure-property prediction using a self-architecting neural network 30

Virtual input effect
predicting ultra-hard binary compounds via cascaded auto- and hetero-associative neural networks 47

YBCO
the effects of Ag addition and magnetic field on melt-processed $YBa_2Cu_3O_x$ superconductors 220
Yttrium
thermodynamic properties of oxygen in RE–O (RE=Gd, Tb, Dy, Er) solid solutions 184

Zr-based Laves phase
a study of the development of a high capacity and high performance Zr–Ti–Mn–V–Ni hydrogen storage alloy for Ni–MH rechargeable batteries 209
$ZrMn_2$
alloying effects on the electronic structure of $ZrMn_2$ intermetallic hydride 192
